U.S. Citizen – authorized to work in the U.S. without sponsorship

## SUMMARY

Computer Science graduate (B.S., Oregon State University, Summa Cum Laude, 3.87 GPA) with hands-on infrastructure and network experience: designed, built, and operates a self-hosted Kubernetes (k3s) platform serving live client sites, and built a MikroTik RouterOS lab on Proxmox running OSPF, DNS, SNMP, and firewall rules. Troubleshoots across the stack with Wireshark, traceroute, and dig; automates with Python, Bash, and Ansible; and documents changes clearly as a Business Analyst at Western Digital.

## TECHNICAL SKILLS

**Networking:** TCP/IP, subnetting, OSPF, DNS, SNMP, firewall rules, routing and switching fundamentals (CS 372)

**Platforms:** MikroTik RouterOS v7 (CHR), Proxmox VE, Linux (Ubuntu, Kali), Kubernetes (k3s), Docker, nginx, Windows Server

**Troubleshooting Tools:** Wireshark, Nmap, traceroute, ping, dig, snmpwalk

**Automation:** Python, Bash, Ansible, Terraform, Git, GitHub Actions CI/CD

**AI Tools:** Claude Code (agentic AI coding assistant), used regularly for scripting, troubleshooting, and documentation

## INFRASTRUCTURE & NETWORK PROJECTS

**Production Linux & Kubernetes Platform** – k3s, Docker, GitHub Actions, AWS S3 2026

- Designed, built, and operate a self-hosted Kubernetes (k3s) cluster serving live client-facing sites, owning deployment, troubleshooting, and maintenance; built CI/CD and encrypted off-site backups with tested restores

**MikroTik OSPF Network Lab** – RouterOS v7, Proxmox VE, Kali Linux 2026

- Built a multi-router lab on Proxmox with two MikroTik CHR routers connected over isolated Linux bridges; configured OSPF so routes propagate dynamically between networks, and verified adjacency, routes, and paths from a Kali client
- Configured DNS resolution, SNMP monitoring, and firewall rules on RouterOS, and tested them with dig, snmpwalk, and traceroute
- Documented the topology, router configurations, and verification steps on GitHub

## PROFESSIONAL EXPERIENCE

**Western Digital Corporation** – Business Analyst 1, Programming May 2026 – Present

- Assess the technical feasibility and impact of proposed system changes and document them as clear, testable requirements for engineering teams across multiple international regions
- Support software deployment workflows and audit operational data integrity against defined acceptance criteria

**Freelance Web Developer & Systems Administrator** – Corvallis, OR (part-time)

May 2026 – Present

- Host and maintain production websites for three clients on Linux servers with nginx; handle issues reported by non-technical owners from first report through resolution

## EDUCATION

**Oregon State University** – B.S. Computer Science (Applied CS), Corvallis, OR

Sep 2021 – Jun 2025

- GPA 3.87 | Summa Cum Laude | Honor Roll, Fall 2021 – Winter 2025 | Merit Scholarship; worked 20 hrs/week throughout
- Relevant coursework: Computer Networks (CS 372), System Administration (CS 312), Operating Systems (CS 374), Intro to Security (CS 370), Defense Against the Dark Arts (CS 373)

**King Mongkut's Institute of Technology Ladkrabang (KMUTL)** – Robotics and AI, Bangkok

2020 – 2021

## CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03), in progress | TryHackMe Pre Security (SEC0), completed;  
Cyber Security 101 (SEC1), in progress
